DURING OCTOBER TO DECEMBER 2018:

- 6 million journeys were made across the bridge
- more than 96% of journeys were paid for before the payment deadline of midnight the day after crossing
- October was a record month with the most journeys ever (2,120,000) over the Mersey Gateway Bridge
- average daily traffic levels in October and November were the highest ever recorded
- the number of journeys resulting in a PCN, and the percentage of revenue generated by PCNs, has fallen.

All revenue, either from tolls or PCNs, contributes towards payment for the new bridge. It is not retained by the Council or any of its contractors.

*From October 2018 PCN figures have been made more accurate. If multiple PCNs have been issued for the **same journey** (e.g. where a hire company has had to transfer liability of a PCN to the hirer of the vehicle at the time) then only the PCN issued to the **responsible party** is counted in the figures. Prior to October 2018 the multiple PCNs were included in the figures.
